29 October 1981

MEMORANDUM FOR: Deputy Director for Administration

FROM: Bruce T. Johnson  
Director of Data Processing

SUBJECT: ODP Report for Week Ending 28 October 1981

25X1

Support to DDO and NFAC

25X1

PEGASUS (Minicomputer Data Base on Terrorist Events). ODP personnel met with representatives of the DDO and NFAC to discuss approaches for improving support of the Agency's terrorism bases. Our discussion centered on the need to improve PEGASUS response time and the long range prospects of combining PEGASUS and FITE (File of International Terrorism Events) into one centralized data base system.

SAFE

Members of the Consolidated SAFE Project Office began reviewing the Block 1 software development specifications which were delivered by TRW to the government on 19 October. The adequacy of these critical documents will be discussed with the contractor at the Block 1 Preliminary Design Review currently scheduled for the week of 16 November 1981 at the SAFE Development Facility in Torrance, California.

Visit to NSA

Messrs.

of 25X1

Operations Division visited NSA on 26 October. The purpose of the visit was to tour their operations area and establish points of contact for future information exchange sessions. An invitation was extended to NSA personnel to visit our facilities.

25X1

Electronic Mail

The AIM (Electronic Mail) system entered limited production on 23 October. Currently there are 152 users on AIM, with as many as 12 concurrent users. Systems Programming Division is currently working on new file handling to improve response time.
